Automatically secures
door in an upright
position to eliminate
awkward ice removal

new solution!

SmartGate™
Safer ice access by
controlling ice flow –
shields user from
dangerous falling
ice during cuber
harvest cycles

Follett – the leader in ice storage and transport

Follett invented the upright ice storage bin and revolutionized the industry. First ice in – first ice out. No more stale, dirty and unsanitary ice from the bottom of an “old style” slope front bin.

Follett makes more ice storage and transport products than anyone – there’s a product to fit your application. Our wide variety of carts and other accessories make the job of moving ice easier and faster.

Unlike imitators, Follett offers innovative, patented features that provide durability, labor savings, safety and sanitation. All with a 5 year parts and labor warranty.
